Physical Form:

Liquid

Primary Container Type:

Vial, glass

Primary Container Content Quantity:

0.500 milliliters

Special Features:

Assayed for: igg, iga, igm, c3c, c4, transferrin, haptoglobin, a2-macroglobulin, a1-acid glycoprotein, albumin, ceruloplasmin, prealbumin, kappa and lambda light chains and retinol binding protein in standard serum

Supplementary Features:

Medsep item for dod, behring diagnostics

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10000
