Usage Design:

For use w/tdx system

Test Capability Quantity:

100

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Component Breakdown Within Each Test Kit:

1 test reagent pack (3 ml vial antiserum, 3 ml vial tracer, 3 ml vial pretreatment); 100 cuvettes; 100 cartridges

Supplementary Features:

Medsep item for dod, abbott labs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
