Usage Design:

An immunoassay for the detection of major metabolites of iphenicyclidine, benzodiazepines, cocaine, amphetamines, tetrahydrocannabinol, opiates, and barbituates

Test Capability Quantity:

25

Product Name:

Test kit multidrug controlled substances 25 tests

Test Media:

Urine

Component Breakdown Within Each Test Kit:

25 test devices; one 8 ml bt wash solution; 50 pipet tips; 1 pipet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510v0
