Usage Design:

For the detection of congenital red cell g6pd deficiency that produces drug-induced hemolytic anemia

Test Capability Quantity:

50

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Special Features:

Vial of g6pd screening test substrate, 5; 12ml vial of phosphate buffer, 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
