Usage Design:

For qualitative detection of igg antibodies to mycoplasma pneumoniae

Test Capability Quantity:

10

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Test kit mycoplasma pneumoniae antibodies detection 100 tests

Test Media:

Plasma or serum

Component Breakdown Within Each Test Kit:

1 box of ten test modules; 1 vial specimen diluent; 1 vial specimen diluent; 1 vial conjugate; 2 vials conjugate rinse; 1 vial color developer;
10 specimen cups; 20 micropipets

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510v0
