Usage Design:

Enzyme immunoassay to detect antibody to hepatitis c virus; use commander system, quantum ii or quantumatic

Test Capability Quantity:

100

Product Name:

Test kit hepatitis c antibody detection 100 tests

Test Media:

Serum or plasma

Component Breakdown Within Each Test Kit:

100 hepatitis c virus encoded antigen (recombinant c100-3, hc-31, and hc-34) coated beads; three 1 ml vi conjugate concentrate; three 19 ml vi conjugate diluent; one 2 ml vi positive control; one 2 ml vi negative control; two 20 ml vi specimen diluent; 1 bt (10 tablets) opd (o-phenylenediamine-2 hci); one 55 ml bt diluent for opd; 1 bt sulfuric acid no. 7212

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
