Physical Form:

Lyophilized

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Usage Design:

Mfor prothrombin time determinations; for use to monitor oral anticoagulant therapy; used to screen for abnormalities in the extrinsic system and to perform quantitative assays of one or more factors of the system

Derivation:

Rabbit brain

Features Provided:

Thinner

Primary Container Type:

Vial

Total Primary Container Quantity:

10

Product Name:

Thromboplastin lyophilized rabbit brain w/10 vi diluent 300tests

Special Features:

Each vial sufficient for 30 test; 300 test per package; lyophilized rabbit brain thromboplastin reagent reconstitution buffer includes approximately 2.0 lyophilized rabbit brain thromboplastin reagent; reconstitution buffer included; approximately 1.3 liquid rabbit brain thromboplastin reagent; 10 x 6 ml

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
