**Usage Design:**

Used for the detection of the enzymes l-proline aminopeptidase and beta-galactosaminidase in yeast cells cultured on laboratory media

**Test Capability Quantity:**

50

**Product Name:**

Test kit candida albicans detection 152 components

**Component Breakdown Within Each Test Kit:**

50 discs, 50 applicator sticks, 50 tubes, 1 bt cinnaldehyde reagent, 1 bt 0.3 pct. Naoh

**Special Features:**

Store at 8 degrees c in the dark

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A510v0
