Component Quantity:

29

Usage Design:

Immunoradiometric assay for the determination of hepatitis b surface antigen in human serum or plasma

Test Capability Quantity:

100

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c and expiration dated

Test Media:

Plasma or serum

Component Breakdown Within Each Test Kit:

Antibody to hepatitis b surface antigen (sheep) volume: 10.5 ml/vial, radioactivity: 244 kbq or less per vial, preservative: 0.1% sodium azide, 2 vials; antibody to hepatitis b surface antigen (mouse monoclonal) coated beads, 1 vial (100 beads/vial); negative control (human): nonreactive for hbsag, anti-hbs, anti-hbc, hbeag and anti-hbe, volume: 4ml/vial, preservatives: 0.2% sodium azide and 0.5% neomycin sulfate, 1 vial; positive control (human): reactive for hbsag, volume: 3 ml/vial, preservatives: 0.1% sodium azide and 0.5% neomycin sulfate, 1 vial; 20-well plastic reaction trays, 6; cardboard cover sealers, 12; 20-place cardboard racks containing plastic counting tubes, 6

Special Features:

For in vitro diagnostic use

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
