Physical Form:

Liquid

Usage Design:

For agglutination serology testing

Primary Container Type:

Vial

Primary Container Content Quantity:

6.000 milliliters

Special Features:

Asl latex reagent test; sufficient for 150 tests

Supplementary Features:

Medsep item for dod, behring diagnostics

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10000
