**Physical Form:**

Liquid

**Usage Design:**

For agglutination serology testing

**Primary Container Type:**

Vial

**Primary Container Content Quantity:**

6.000 milliliters

**Special Features:**

Asl latex reagent test; sufficient for 150 tests

**Supplementary Features:**

Medsep item for dod, behring diagnostics

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A10000
