Physical Form:

Dried

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c and expiration dated

Usage Design:

Slide multilayered analytical element coated on a clear polyester support for quantitative measure of cholesterol in serum or plasma

Primary Container Type:

Any acceptable

Total Primary Container Quantity:

50

Special Features:

Kodak etkachem clinical chemistry slides (chol)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
