Usage Design:

For genocheck and fluorescent microscopy

Primary Container Type:

Package

Product Name:

Phosphate buffered saline sol f/genocheck&fluorescent microscope 12s

Special Features:

Phosphate buffered saline (dry powder blends) 12 pkgs; each package prepares 1 liter of solution containing sodium chloride (120 mmol), potassium chloride (2.7 mmol) and phosphate buffer salts (10 mmol). Ph 7.6 at 25 deg. C

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
