Physical Form:

Dried

Usage Design:

For quantitative determination of glucose in whole blood using a specially designed photometer (hemocue-b glucose photometer)

Primary Container Type:

Vial

Primary Container Content Quantity:

20.000 each

Total Primary Container Quantity:

4

Special Features:

Reagent consists of: 7% w/w enzyme mix: mutarotase, glucose dehydrogenase and diaphorase, 18% w/w nad (nicotinamide-adenine dinucleotide)26% w/w poly (propylene glycole), 15% w/w mtt (methylthiazolyldiphenyl tetrazolium), 30% w/w saponin, 3% w/w ammonium chloride, 1.5% w/w sodium fluoride.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
