Physical Form:

Liquid

Usage Design:

To perform valid sodium, potassium and chloride determinations

Primary Container Type:

Vial

Primary Container Content Quantity:

10.000 milliliters

Total Primary Container Quantity:

18

Product Name:

Reference standard chloride potassium 10ml 18s

Special Features:

Ektachem reference fluid ii; an aqueous solution of electrolytes; c/o reactive ingredients of 1.2 m cesium chloride/0.2 m sodium bicarbonate and other ingredients of polyvinylpyrrolidone/potassium hydroxide; the solution is used as a reference fluid for potentiometric assays on Ektachem analyzers; 18 vials of 10 ml each

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10000
