**Features Provided:**

Enzymeimmunoassay

**Protective Storage Feature:**

Expiration dated and requires refrigeration between 2 degrees to 8 degrees c

**Product Name:**

Epstein-barr virus nuclear antigen-1 test kit

**Component Breakdown Within Each Test Kit:**

Recombinant ebna-1 antigen coated microassay plate: 95 wll, configured in twelve 1x8 strips; serum diluent; calibrator: human serum; high positive contro: human serum; negative control: human serum; low positive control: human serum; horseradish-peroxidase conjugate: goat anti-human igg; chromogen/substrate solution: tetramethylbenzidine; wash buffer 20x concentrate; stop solution: sulfuric acid

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A510v0
