Product Name:

Test kit pcr and dna polymerase amplification

General Description:

Pcr control reagent kit contains amplitag dna polymerase 50 microliter 250 units 5 units/microliter; genamp 10x pcr buffer 1.5 microliter; genamp dntps set of four c/o datp, dttp, dgtp and dctp, each vial containing 320 microliter of a 10 micro-milliliter solution of the specified deoxynucleoside triphosphate; geneamp lambda control reagents, 0.1 microgram of full-length bacteriophage lambda dna template (in 100 microliters of 10 micromilliliter tris-hcl ph 8.3) and 1 nmol each of 2 synthetic oligonucleotide primer (in 50 ml of 10 micromilliliters tris-hcl, ph 8.3), each 25 nucleotides in length; amplitag dna polymerase 50 microliters 250 units 5 units/ml; geneamp dntps, set of 4 c/o datp, dttp, dgtp, and dctp, each vial containing 320 microliter of a 10 micromilliliter solution of the specified deoxynucleoside triphosphate; geneamp 10x pcr buffer ii, 1.5 microliter; and mgcl 2 solution, 1.5 ml, 25 micromilliliter; sufficient for 100 amplifications

Shelf Life:

N/a

Unit Of Measure:
