**Physical Form:**

Liquid

**Protective Storage Feature:**

Expiration dated and requires refrigeration between 2 degrees to 8 degrees c

**Usage Design:**

For in vitro diagnostic use as a control to monitor the performance of coulter instruments

**Derivation:**

Human

**Primary Container Type:**

Tube with screw cap

**Primary Container Content Quantity:**

6.000 milliliters

**Total Primary Container Quantity:**

8

**Special Features:**

Cname: 4c plus normal control; useed as a control to ensure the instrument is working properly, not for calibration; potential biohazardous material; control tube cap is plastic with a cork center

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A10000
