Usage Design:

Sequence data generated from m13 dna test

Test Capability Quantity:

100

Component Breakdown Within Each Test Kit:

Testkit, dna analysis 1 sequitherm dna polymerase; 110 x, a, t, c termination mixes; 1 control template, puc19; 1 control sequencing primer; 1 sterile deionized water; 1 stop gel loading buffer; 1 t4 polynucleotide kinase; 10 x polynucleotide kinase buffer 100

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
