Furnished Items:

25 vials of hemoliance recombiplastin matched with 25 vials of hemoliance recombiplastin diluent

Storage Temperature Range:

+2.0/+8.0 degrees celsius

Product Name:

Test kit prothrombintime 25 vials hemoliance recombiplastin

Special Features:

Hemoliance recombiplastin reconstituted with hemoliance recombiplastin diluent is a liposomal preparation of recombinant human tissue factor and purified phospholipids, calcium chloride, buffer and a preservative for use in the one stage pt test. Kit components are lot specific and are not interchangeable between different kit lot numbers

Special Test Features:

Ksodium azide used as a preservative in recombiplastin may react with lead or copper drain lines to form explosive metal azides. Upon disposal flush with large volumes of water to prevent azide build up in drain

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
