Usage Design:

Designed to detect cytokines in cell culture fluids

Product Name:

Human ifn

Component Breakdown Within Each Test Kit:

One each recombinant human ifn standard; rabbit anti-human ifn polyclonal antibody; 96-well pre-coated immunoplate; assay diluent; wash buffer; enzyme diluent; alkaline-phosphatase conjugated goat anti-rabbit antibody; color reagent a; color reagent b; stop solution; acetate plate sealers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
