Usage Design:

For the qualitative and semi-quantitative measurement of crp in human serum

Test Capability Quantity:

100

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c and subject to damage by freezing

Test Media:

Serum

Component Breakdown Within Each Test Kit:

Crp latex reagent; crp positive control; crp negative control; glycine-saline buffer; reaction slide; pipet/stir sticks

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
