Usage Design:

Measures total cytokino (free andbound) regardless of cytokine binding molecules

Test Capability Quantity:

96

Product Name:

Human il-7

Component Breakdown Within Each Test Kit:

Recombinant human il-7 standard, rabbit anti-human il-7 polyclonal antibody, biotin conjugated il-7, 96-well pre-coated immunoplate, (goat anti-rabbit antibody), assay diluent, serum diluent, wash buffer, streptavidin conjugated alkaline phosphatase, color reagent a, color reagent b, stop solution, acetate plate sealers

Special Features:

Storage temperature 4 degrees c; assay temperature room temperature; samplmatrix serum, plasma, csf, saliva, other biological fluids, and tissue culture media

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
