Usage Design:

Measures total cytokine (free and bound) regardless of cytokine binding molecules

Test Capability Quantity:

96

Product Name:

Human il-3

Component Breakdown Within Each Test Kit:

Recombinant human il-3 standard, rabbit anti-human il-3 polyclonal antibody, biotin conjugated il-3, 96-well pre-coated immunoplate, (goat anti-rabbit antibody), diluent no 1, diluent no 2, wash buffer, streptavidin conjugated alkaline phosphatase, color reagent a, color reagent b, stop solution, acetate plate sealers

Special Features:

Storage temperature 4 degrees c; assay temperature room temperature; sample matrix serum, plasma, csf, saliva, other biological fluids, and tissue culture media

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
