Usage Design:

To determine alcohol concentrations in saliva which correlates with blood alcohol concentrations

Test Capability Quantity:

24

Total Primary Container Quantity:

1

Product Name:

Alco-screen

Test Media:

Saliva

Component Breakdown Within Each Test Kit:

24 individual foil wrapped plastic strips with reactive tip and a color chart

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
