Usage Design:

Fluorescent str-based assay for human identification

Test Capability Quantity:

200

Protective Storage Feature:

Frozen for preservation and requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Amplstr identifiler pcr amplification kit

Component Breakdown Within Each Test Kit:

Ampflstr pcr reaction mix; ampflstr identifier prime set; amplitag golddna polymerase; ampflstr control dna 9947a; ampflstr identiler alleleic ladder

Special Features:

Fifteen tetranucleotide str loci and amelogenin are co-amplified in a singel pcr tube

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
