Usage Design:

Qualitative detection of shiga toxins (stx 1 and stx 2); aids in the diagnosis of enterohemorrhagic e.Coli infections

Test Capability Quantity:

48

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c and expiration dated

Product Name:

Test kit e coli detection of e coli shiga toxin 48 well kit

Test Media:

Feces

Component Breakdown Within Each Test Kit:

Seven bottles of different reagents; transfer pipets; microplate cover; well strips; test strips; package insert; procedure card

Special Features:

Direct qualitative enzyme immunoassay for detection of e.Coli shiga toxin; 48 well/kit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
