Physical Form:

Lyophilized powder

Derivation:

Bovine

Primary Container Type:

Vial

Primary Container Content Quantity:

2.000 milliliters

Total Primary Container Quantity:

10

Product Name:

Fibrinogen test reagent lyophilized pwdr bovine 2ml 10s

Special Features:

Hemoliance q.F.A. Thrombin is bovine thrombin to be used for the quantitative determination of fibrinogen based on the clauss method

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
