End Application:

Use on blood gas, electrolyte, metabolite analyzers

Product Name:

Linearity verification 5 test levels 4 2.5ml ampules p/lever 5s

Special Features:

4 ampules (2.5ml ea.) of buffered solution of eletrolytes, glucose and lactate in each of the 5 levels of tests; used to verify the performance and linearity of analyzers; troubleshoot analyzer problems; document proper calibration; comfirm preventative maintenance; assist with regulatory compliance

Supplementary Features:

Has a shelf life of 21 months when stored at 2-8 deg.C, or 9 months when stored at room temp.; protect from freezing or exposure to temperatures greater than 30 deg. C

General Description:

5 test levels; 4 2.5ml ampules per level

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
