Usage Design:

To grow culture control organisms for quality control of the microscan instrument

Primary Container Type:

Vial

Product Name:

Control streptococcus pneumoniae to grow culture cont organisms

Special Features:

Contains stabilized, preserved viable microorganism; each vial contains lyophilized st. Pneumo organism for reconstitution and use as a control organism

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
