Physical Form:

Lyophilized powder

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Derivation:

Human

Primary Container Type:

Vial, glass

Primary Container Content Quantity:

1.000 milliliters

Product Name:

Control coagulation lyophilized level iii 1ml 25s

Special Features:

Plasma coagulation control abnormal level iii; refrigeration required; 25 per pkg./1ml

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
