End Application:

Hitachi fmbio and fmbio ii fluorescence imaging systems and abi prism 377 dna sequencer; abi prism 373 dna sequencer and abi prism 310 genetic analyzer

Product Name:

Hprt, fluorescein

Special Features:

Fluorescent primer pairs and allelic ladders are light sensitive; therefore, minimize light exposure

Functional Description:

Allow fluorescent detection; has an excitation at 488 nm and a light emission at 532 nm; provides all the materials required to amplify str regions of purified genomic dna except taq dna polymerase; produces fluorescein-labeled fragments representing alleles from the template dna

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
