Usage Design:

A rapid one step test for the qualitative detection of hepatitis b surface antigen in serum or plasma

Protective Storage Feature:

Subject to damage by freezing

Test Media:

Plasma or serum

Special Features:

Zmaterials provided test devices, disposable specimen droppers, package insert; materials required but not provided specimen collection container, centrifuge for plasma only, timer; store at room temperature or refrigerate 2-30 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
