Usage Design:

Used for the non-radioactive quantification of human resistin in serum, plasma and other biological media

Test Capability Quantity:

38

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Human resistin elisa kit

Test Media:

Plasma or serum

Component Breakdown Within Each Test Kit:

Xpipet with tips 10ul-200ul, multi channel pipette 50ul-300ul, reagent reservoirs, vortex mixer, refrigerator, deionized water, microtiter plate reader capable of reading absorbency at 450 nm, microtiter plate shaker, absorbent paper or cloth

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510v0
