Physical Form:

Powder

Primary Container Type:

Bottle

Culture Medium Ph:

7.30

Primary Container Content Quantity:

500.000 grams

Product Name:

Methicillin - resistant staphylococcus aureus agar

Special Features:

Used as a screening medium for the determination of methicillin resistance and oxacillin resistance in staphylococcus aureus

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
