End Application:

Triage meterplus

Usage Design:

Fluorescence immunoassay for determination of cross linked fibrin degradation products

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Triage d-dimer test

Test Media:

Blood or plasma

Special Features:

Shelf life 14 days at room temp. Stable while stored in pouch. Kit contains 25 transfer pipettes, 25 test devices, 1 reagent code chip, and 1 roll printer paper

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
