Physical Form:

Liquid

Primary Container Type:

Ampul

Culture Medium Ph:

7.00

Primary Container Content Quantity:

2.000 milliliters

Total Primary Container Quantity:

2

Product Name:

Tryptone glucose extract broth

Special Features:

Incubation time 18-120 hours. Shelf life 12 months. Used to detect total heterotrophic microorganisms in water and other liquids

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
