End Application:

Immunohistology

Protective Storage Feature:

Controlled room temperature

Identification Designator:

Antibody-membrane localization

Container Type:

Vial

Approximate Shelf Life:

24.0 months

Product Name:

Supernatant antibody

Dot Identification Number:

Un1687

Special Features:

Mesothelioma ab-1 (clone hbme-1); mouse monoclonal antibody; 0.5ml tissue culture supernatant with 0.09percent sodium azide; store at 2 to 8deg c

Functional Description:

Positive control-mesothelioma

Supplementary Features:

For research use only; do not discard in plumbing systems; avoid skin and eye contact, inhalation or ingestion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
