End Application:

Immunohistology

Protective Storage Feature:

Controlled room temperature

Identification Designator:

Neuroendocrine marker; localization-cytoplasmic

Container Type:

Vial

Approximate Shelf Life:

24.0 months

Product Name:

Synaptophysin supernatant antibody

Dot Identification Number:

Un1687

Special Features:

Synaptophysin (clone sp11); rabbit monoclonal antibody; 0.1ml tissue culture supernatant with 15mm sodium azide; store at 4deg c; stable for 24 months 2 to 8deg c

Functional Description:

Positive control-pancreas or imr cells or neuroendocrine tumors

Supplementary Features:

For research use only; do not discard in plumbing systems; avoid skin and eye contact, inhalation or ingestion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
