End Application:

Immunohistology

Protective Storage Feature:

Controlled room temperature

Identification Designator:

Cellular localization-cytoplasmic and nuclear

Container Type:

Vial

Approximate Shelf Life:

24.0 months

Product Name:

Calretinin

Dot Identification Number:

Un1687

Special Features:

Calretinin (clone sp13); rabbit monoclonal antibody; an intracellular calcium-binding protein belonging to the troponin c superfamily ef-hand domain; supplied as 0.1ml tissue culture supernatant with 15mm sodium azide; store vial at 4deg c; stable for 24 months when stored at 2 to 8deg c

Functional Description:

Positive control-mesothelioma

Supplementary Features:

For research use only; do not discard in plumbing system; avoid skin and eye contact, inhalation or ingestion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
