End Application:

Immunohistology

Protective Storage Feature:

Controlled room temperature

Identification Designator:

Cellular localization-cytoplasmic

Container Type:

Vial

Approximate Shelf Life:

24.0 months

Product Name:

Melanoma ab-1 antibody

Dot Identification Number:

Un1687

Special Features:

Melanoma (gp100) ab-1 (clone hmb45); mouse monoclonal antibody; recognize a protein in melanocytes and melanomas; supplied as 0.5ml tissue culture supernatant with 0.09 percent sodium azide; store vial at 4deg c; stable for 24 months when stored at 2 to 8deg c

Functional Description:

Positive control-melanoma

Supplementary Features:

For research use only; do not discard in plumbing systems; avoid skin and eye contact, inhalation or ingestion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
