End Application:

Immunohistology

Protective Storage Feature:

Controlled room temperature

Identification Designator:

Cellular localization-cell membrane and cytoplasm

Approximate Shelf Life:

24.0 months

Product Name:

Cd1a ab-5 antibody

Dot Identification Number:

Un1687

Special Features:

Cd1a ab-5 (clone o10); mouse monoclonal antibody; identifies at least 5 genes; cd1 is expressed on cortical thymocytes, langerhans cells and dendritic cells; supplied as 0.1ml at 200ug/ml; purified from ascites fluid by protein g chromatography; prepared in 10mm pbs, ph 7.4, with 0.2percent bsa and 0.09percent sodium azide; stable for 24 months when stored at 2 to 8deg c

Functional Description:

Positive control-tonsil

Supplementary Features:

For research use only; do not discard in plumbing systems; avoid skin and eye contact, inhalation or ingestion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
