End Application:

Immunohistology

Protective Storage Feature:

Controlled room temperature

Identification Designator:

Cellular localization-nuclear

Approximate Shelf Life:

24.0 months

Product Name:

Cytomegalovirus ab-1 antibody

Dot Identification Number:

Un1687

Special Features:

Cytomegalovirus ab-1 (clone cmv01); mouse monoclonal antibody; cmv is an opportunistic pathogen infecting lung, kidney, gut and other organs in immature and immunosuppressed systems; supplied as 0.5ml at 200ug/ml; purified from ascites fluid by protein g chromatography; prepared in 10mm pbs, ph 7.4, with 0.2percent bsa and 0.09percent sodium azide; stable for 24 months when stored at 2 to 8deg c

Functional Description:

Postive control-cmv infected tissue

Supplementary Features:

For research use only; do not discard in plumbing systems; avoid skin and eye contact, inhalation or ingestion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
