**End Application:**

Immunohistology

**Protective Storage Feature:**

Controlled room temperature

**Identification Designator:**

Cellular localization-nuclear

**Approximate Shelf Life:**

24.0 months

**Product Name:**

Cytomegalovirus ab-1 antibody

**Dot Identification Number:**

Un1687

**Special Features:**

Cytomegalovirus ab-1 (clone cmv01); mouse monoclonal antibody; cmv is an opportunistic pathogen infecting lung, kidney, gut and other organs in immature and immunosuppressed systems; supplied as 0.5ml at 200ug/ml; purified from ascites fluid by protein g chromatography; prepared in 10mm pbs, ph 7.4, with 0.2percent bsa and 0.09percent sodium azide; stable for 24 months when stored at 2 to 8deg c

**Functional Description:**

Postive control-cmv infected tissue

**Supplementary Features:**

For research use only; do not discard in plumbing systems; avoid skin and eye contact, inhalation or ingestion

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
