Physical Form:

Liquid

Usage Design:

Qualitative immunofluorescence

Primary Container Type:

Vial

Product Name:

Immunoglobulin m (Igm), polyclonal fitc labeled

Special Features:

Rabbit anti-Igm conjugated to fluorescein isothiocyanate (fitc); contains 2 ml prediluted primary antibody; 0.05 m tris buffered saline (ph 7.4-7.8), 0.1 percent sodium azide, and 1 percent carrier protein.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10000
