**Physical Form:**

Liquid

**Usage Design:**

Qualitative immunofluorescence

**Primary Container Type:**

Vial

**Product Name:**

Immunoglobulin g (igg), polyclonal fitc labeled

**Special Features:**

Sheep anti-igg conjugated to fluorescein isothiocyanate (fitc); contains 2 ml prediluted primary antibody; 0.05 m tris buffered saline (ph 7.4-7.8), 0.1 percent sodium azide, and 1 percent carrier protein.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A10000
