End Application:

Medical and laboratory testing products

Product Name:

Mcp-1 human elisa kit

Special Features:

Mcp-1 human elisa kit quantifies natural and recombinant human monocyte chemoattractant protein-1 (mcp-1) in serum, plasma, buffered solution, or cell culture medium; mcp-1 attracts recruits monocytes, memory t cells and dendritic cells

Supplementary Features:

Concentration-31.2-2000pg/ml; detection method-colorimetric; gene id-6347; incubation time-3hrs; platform-microplate reader; product size-96 tests; readout enzyme-hrp; species-human; store kit at 2-8deg c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
