**End Application:**

Medical and laboratory testing products

**Product Name:**

Il-1b rat elisa kit

**Special Features:**

Kit quantifies natural and recombinant rat il-1b in serum, buffered solution, or cell culture medium; il-1b is important in immune response; concentration-31.2-2000pg/ml; product size-96 tests

**Supplementary Features:**

Detection method-colorimetric; incubation time-5hrs; platform-microplate reader; readout enzyme-hrp; research category-immunology; sample type (specific)-serum and supernatants; sample volume-50ul; species-rat

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
