End Application:

Medical and laboratory testing products

Product Name:

Il-1b rat elisa kit

Special Features:

Kit quantifies natural and recombinant rat il-1b in serum, buffered solution, or cell culture medium; il-1b is important in immune response; concentration-31.2-2000pg/ml; product size-96 tests

Supplementary Features:

Detection method-colorimetric; incubation time-5hrs; platform-microplate reader; readout enzyme-hrp; research category-immunology; sample type (specific)-serum and supernatants; sample volume-50ul; species-rat

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
