End Application:

Bd cytometric bead array (cba)

Special Features:

Contains human il-13 standard, human il-13 capture bead e6, and human il-13 pe detection reagent. Bead-based immunassay capable of measuring human interleukin- 13 in serum, plasma, and cellculture supernatant samples. Set contins one vial each of capture bead and pe detection reagent and two vials of standard. Capture bead and pe detection reagent components have been formulated to a 50x concentration to ensure product performance when multiplesed. When reconstituted in 4.0 ml assay diluent, the standard has a protien cincertration of 2, 500 pg/ml. Discard unused reconstituted standard, do not stor or reuse. Store lyphilized standard and other components at 4 degrees c. Protect pe detection reagent from prologed exposure to light.
